

## Internship - Junior Business Engineer

**Location:** Amsterdam

Do you have a business/information management background but you also understand what a database is? Do you share our vision that IT is becoming increasingly important for the daily operations of businesses? Then we have the opportunity for you! React to this vacancy if you want to take this challenges with us!

### Who we are looking for:

We are looking for talented, enterprising people who are passionate about delivering high end solutions and work in the area of tension between business and IT. As an intern at Finaps you get several educational opportunities and the prospect for future employment.

Your tasks will be:

- Get acquainted with the Mendix platform
- Develop together with the Finaps team (mobile) web applications for our clients
- Sit directly with our clients to understand their challenges and processes, and translate these into working solutions

### Do you have:

- A passion for software
- A skill for process analysis and translate this into clients solutions
- HBO – WO educational level
- Interested in both the technical and the commercial side of IT
- A good command of English
- An eye for detail and quality
- A passion to push yourself and the team
- Experience with commercial software development is a plus

### We offer:

A dynamic, high-quality and ambitious working environment in the South of Amsterdam. Within the team you will have room for individual input and at the same time work independent. Finaps invests in their people through (internal) training, coaching and we facilitate everything to make it as easy as possible to become successful. You will receive market-level reimbursements.

### About Finaps

Finaps develops innovative IT solutions using advanced technologies such as the Mendix platform and SAS business analytics. We distinguish ourselves by developing web- and mobile applications for specific domains such as the financial services industry, public sector, fast-moving consumer goods, human resources, fraud and charity. These applications are fully integrated within our clients' IT landscape. Our team of young, impassioned and ambitious business engineers have a *can-do* mentality and are solution driven, both from a technical point of view as well as in the services we provide. For organizations, we are the partner of choice for the delivery of high quality innovative business solutions that work.
